**"Knowledge is power!" The best and most research on Cancer you can find in a book. A must read.**

This book has been developed as a tool to help people and their loved ones find out what others have discovered in their fight against cancer. As you read through the passages, and click on the links, you will hear directly from doctors who have used non-traditional methods of cancer treatments that are not routinely used by mainstream medical therapy. Listen for yourself. Learn what they have to say. The more you know, the better equipped you will be to battle this insidious disease.

There are millions of survivors. What did they do to overcome the negative odds? As you read, you will discover that there are doctors curing cancer now, as we speak. I have a background as a hypnotherapist, working with cancer patients for over twenty five years for **free**. Last year, a routine blood test showed I had elevated PSA numbers,

which is a signal for prostate cancer. As I began on my own personal quest for knowledge and options with the possibility of having Cancer the book began to evolve. The internet opened my eyes to all those providing and seeking non-traditional methods of care. **It took me a year to compile all of this research, and I'm sharing it with you. Just keep an open mind.**

The doctors you will hear from were once "mainstream doctors." Some still are. Some people may say, "I don't have cancer, why should I read this book.?" One out of every three people get some form of cancer. Unfortunately, everyone knows a friend or family member that has diagnosed with Cancer. In my years of experience working with people who haven't been diagnosed with Cancer, once they hear the diagnosis from a doctor their brain shuts off and they can not think straight. Most people with Cancer will not die today, tomorrow, or next month. However, I put this research together as a reference to aide those about what options they have once diagnosed. Don't wait until you or a loved one gets cancer to get informed. The choices you make today can help prevent, reduce the likelihood and even cure cancer and other diseases.

Many are skeptical about the information I lay out in this book. Most people blindly believe our doctor's, corporate leaders and our government for all the answers and for the truth. Do you remember the cigarette company's saying that there was no scientific studies that showed cigarette smoking caused cancer? Most people wait until it's too late to do research, and hear from their Doctor that nothing can be done. Doctor's are only as good as their own experience's. Many doctors have not sought out information on alternative treatments and only rely on what they learned in medical school years ago. There are many tests you can take today to find out if you have cancer. There are tests to determine what treatment will and will not work for the type of cancer you have, i.e. a urine test for prostate cancer. You will find these tests in this book. There are many things that can give you cancer. Find out what they are in this book. Find out what you can do today to protect yourself and your loved ones.

### **Some of the Five Star Generals. Doctors that are fighting and winning the war on Cancer.**

#### **Dr. Burzynski.**

At the Burzynski Research Institute. Dr. Burzynski had to go through many problems caused by the FDA with his new treatment of gene targeted medication called Antineoplastin. He has had much success putting people into remission more then conventional medicine. His invention threatened the cancer industry from there big profits. He says he is fighting for doctors to give them freedom of choice, and for the patients, the freedom to choose what medication they should get. His treatment caused brain tumors to vanish in little children.

#### **Dr. Mercola**

He is an internationally renowned natural health physician. Dr. Mercola is board-certified in family medicine, trained in both traditional and natural medicine. He is an osteopathic physician. Osteopathic physicians practice a "whole person" approach, treating the entire person rather than just symptoms. He focuses on preventive healthcare, helping patients develop attitudes and lifestyles that don't just fight illness, but help prevent it, too. He has the number one website for information in the world. He has been on television programs such as Dr. Oz. and has interviewed many doctors.

#### **Dr. James W. Forsythe M.D. HMD.**

He is a board certified oncologist, and one of the most respected physicians in the United States, offering a host of treatments. What makes him tops of my list of doctors? He does Cancer Chemo Sensitivity Testing. AVI. This test will determine

what treatments will, or will not work on your specific cancer. Most doctors don't do this testing!. He said that chemo sensitivity testing is one of the biggest changes in all his years of practice. He has had over two hundred thousand patients in 40 years. He says that chemo sensitivity testing has made a big difference in the success in his practice, and what he means by success is remission!

### **Dr. Simoncini**

Dr. Simoncini is an oncologist. He believes in a natural way to treat cancer by using sodium bicarbonate. Dr. Simoncini also believes that cancer is caused by a fungus, namely Candida Albicans. He has cured many cancer patients with this treatment, even though his non-traditional treatments have caused him harassment from his government. He says when you go into the body and see the cancer it's always white, and claims it's a fungus. He also says by looking inside the tumor you are able to see it's a solid apses.

### **Dr. Tom Levy.**

Dr. Thomas E. Levy is a board certified cardiologist. He no longer has a clinical practice of medicine and cardiology. His focus today is on the delivery of vitamin C and other nutrients into the body orally. He attended Johns Hopkins University, Tulane University School of Medicine and the University of Denver College of Law. He did his internship and internal medicine residency at Tulane University and affiliated hospitals. He has written a number of books such as; Optimal Nutrition for Optimal Health, The Roots of Disease, Connecting Dentistry & Medicine, Infectious Diseases and Toxins, Stop America's #1 Killer and Primal Panacea.

### **Dr. Nick Gonzalez. MD. PC.**

Dr. Gonzalez, located on East 36th Street in NYC, works with Dr. Linda L. Issacs. He has been treating patients diagnosed with cancer and other serious degenerative illnesses since 1987. He treat patients with all types of cancers, and individualizes the treatment for each patient according to their specific type of cancer. His treatment protocol consist of diet, supplements and detoxification with coffee enemas ( similar to the Gerson protocol ).

### **Dr. Leonard Coldwell**

Dr. Leonard Coldwell has a successful career, and has claimed to have cured over 35,000 cancer patients. Years ago he cured his mother when doctors said there was nothing they could do for her. He has stated that every cancer can be cured in two to sixteen weeks. He states that once the body gets rid of the acid it should be replaced with an alkalized PH diet from eating raw vegetables and juicing with greens. He believes your PH level should be 7.5 for healing.

### **Julian Whitaker, MD.**

The Whitaker Wellness Institute is his clinic and he uses the latest alternative therapies to help people reclaim their health and prolong their lives. He uses intravenous vitamin C, hyperbaric oxygen therapy and micro current therapy. Dr. Whitaker has had success dealing with cancer and other illnesses.

### **Dr.Oz.**

I'm a big fan of Dr. Oz. His talk show guests discuss alternative treatments. There are

millions of viewers. I hope some day he will interview Dr. Burzynski, Dr. James W. Forsythe, Dr. Simoncini, Dr. Thomas E. Levy, Dr. Gonzalez, Dr. Leonard Coldwell, Dr. Whitaker and others. He says when he goes to the supermarket he sees produce as medicine. If you want to know about health, look at his TV show. Look at his website. You'll learn a lot.

### **Turmeric.**

I take it every day. Since I have been taking it my arthritis has left my body. My wife has had a recurring problem with pre cancerous polyps and undergoes a yearly colonoscopy. Last year she started taking Turmeric 2 times a day. Her last test showed no polyps - the first time in 13 years. If more people knew about turmeric the numbers of colon cancers would be lowered. I found a good form of turmeric from Life Extension.com (Super Bio Curcumin). In tests its been shown to absorb up to seven times better than conventional curcumin. Turmeric is also beneficial for other types cancers.

### **3.0 Teslar MRI.**

Its been said that early detection is key to a cure. Now with the 3.0 Teslar MRI, cancer can't hide in your body. Presently, its used only for brain cancer and women at high risk of cancer or dense breast. (See in Chapter 5.)

### **Cancer Chemo sensitivity Testing. AVI**

Every person should demand a Cancer Chemo sensitivity test before they take chemotherapy. Chemo can give you cancer and it might not help you at all. There are names and numbers in this book of places that give this test, or call Dr. James W. Forsythe (that's in this book).

### **About Sal DiBella.**

Sal DiBella. has been working with people with cancer and other life threatening illnesses for over twenty-five years with Fight For Life Inc. My experience over those years has taught me that the mind really can heal the body. It was with this belief that I decided to enroll in school to learn to become a hypnotherapist and how to better use my mind to help others cure what medicine sometimes could not. While attending school I befriended two amazing, caring and exceptional talented people, well respected in their fields; Adrian Himmelbrand, a clinical psychologist and Joanne Lajam a registered nurse. Adrian, Joanne and I went on to attend another school together, given by Dr. Carl Simonton, author of "Getting Well Again".

The son of two parents who died battling Cancer I embarked on a journey to discover how families and support groups tried to deal with fighting Cancer and supporting those plagued by it. I still remember my first visit to a cancer support group so clearly. It was wintertime, we were in a church, the two women running the support group looked as though they already wanted to leave. As a visitor I sat and observed as everyone in the circle and took turns crying about their cancer, complaining about their doctor and how unhappy they were with their treatment options. I couldn't help but think to myself how negative a place and experience this was for a person with cancer.

The people that weren't depressed before they came would most certainly be leaving depressed. When it was my turn to speak I spoke to everyone about how I was a

hypnotherapist and about my beliefs in the power of the mind and it's ability to heal the body.

Unbeknownst to me at the end of the meeting there were people lined up waiting to talk to me about what they could do to help themselves. We all left the room and continued our conversation in the church parking lot. It was about twenty degrees outside, but none of us seemed to notice. I learned a lot that night, from those people on the front lines in the war against cancer, their fears, regrets hopes and dreams. It was because of that night, that I knew that I had to create a new group, one that would provide those great people with a sense of hope and determination to fight when everything and everyone around them had given up.

Joanne, Adrian and I started "Fight For Life Inc." a non-profit support group that was determined to be upbeat and positive. We met once a week for over twenty years, with hundreds of people and their families who were fighting cancer. Adrian led the seminars educating those present on depression and anger. Joanne and I sat with those present one by one and worked with them utilizing various visualization, relation and hypnosis techniques. I visited homes and hospitals work with those who were not strong enough to come to our support groups.

### **Let's Start Labeling Treatment For Cancer. by Sal DiBella**

In my opinion there should be a chart with protocols. And it should say.

This is for treatment that has worked. And not hurt people in any way.

Weather the treatment is in the USA or other country's.

**Only treatments that has worked and not hurt anyone in any way.**

**List by protocols. What are the results from people who had treatments . ( Out of 1,000 people )**

**An example:**

**1. cure 2. 6 months to 1 year to live 3. Under 6 months to live 4. Over 10 years to live.**

#### **Protocol # 1 Number / Percent**

A. For cancer in one lung not metastasize. Chemo, Radiation, operation.

B. For lung cancer in two lung's. Not metastasize, chemo, radiation, operation.

C. For cancer in one lung metastasize, chemo, radiation, operation.

D. For cancer in 2 lung's not metastasize. chemo, radiation, operation.

E. A treatment either experimental or main stream with heat going into the tumor.

F. Using intravenous victim c not metastasize.

G. Using intravenous victim c with metastasize.

H. Using intravenous c with the past having chemo, radiation.

I. Any other doctor's treatment that has cured patients. In or outside the USA.

**People with cancer should have the choice of there treatment. For themselves and there family.**

**Doctors should have a choice if they want to give alternative treatments. In the USA.**

**Doctors should buy this book and learn how to cure cancer. Your patients and your family's life depend on it. Doctor's did not learn what's in this book in school.**
